Sheikh Irtiaj Ahmed -230042130
Talha Zubayer -230042119

Department of Computer Science and Engineering
Islamic University of Technology, Dhaka

Overview

This School Admission Management System is a console-based tool designed to make school applications easier.

Applicants can put their relevant information and apply for a choice list of preferred schools in a particular region.

The Master Admin initiates lottery method, School seats are reserved for quota such as local school, freedom fighter etc.

School admin panel that can view and update the respective school's info.

User can delete, download, recover their Form & ID.

Motivation of the project

In Bangladesh, guardians face a lot of difficulty during school admissions

- Time Consuming
- Corruption from broker,
- Biased Selection
- Wasting money on bribery
- Lack of clear information about school

Our project aims to recreate and improve that system

Key Features

Admission Applicants

New form :

- Fetch student info from birth certificate
- Mobile No. check by OTP
